ROTARY MULCHER

The Jagatjit Rotary Mulcher is a rugged and efficient implement specially designed for chopping and spreading crop residues like sugarcane trash, paddy straw, and maize stalks. Built for high performance in challenging field conditions, it converts heavy crop residues into a fine mulch layer, promoting faster decomposition, moisture conservation, and weed control.

SALIENT FEATURES & BENEFITS

- Ideal for Sugarcane Trash Management & Ratoon Farming.
- Transforms residues into a natural mulch, eliminating the need for stubble burning and adding organic matter back into the soil.
- Precision-Balanced Rotor Shaft, ensures vibration-free, high-speed performance even at higher RPMs.
- Adjustable rear roller, ensuring consistent mulching depth, easily adaptable to different field conditions.

Technical Specification

Model	JRM 6	JRM 7	JRM 8
Working Width (mm)	1834	2080	2337
Blade Type	Y & Straight Blades	Y & Straight Blades	Y & Straight Blades
Y- Blades	40	44	48
Straight Blades	20	22	24
Blade Material	Boron Steel	Boron Steel	Boron Steel
Blade Thickness	7 mm	7 mm	7 mm
Weight (kg)	590	680	785
